

GRINDING OF BUMPERS AND DASHBOARDS WITH 11 KW MOTORS!

Scraps from moulding machines can be cost effectively size reduced with the new innovative solution designed by TRIA 'Bumper Shredder'.

An output of 200 or 400 kg/h of homogeneous and clean regrind material via a two step size reduction process with a noise level of 85db(A)

The main advantages of this solution:

- Installed power, only 11 kW (for 200kg/h) or 26 kW (for 400kg/h)
- Noise level 85db(A)Leq
- High quality regrind, low dust and uniform particle size
- Ease of clean down
- Low investment costs

Please contact our sales team for further details on this technical solution installed at TOYOTA (4 plants) , HONDA (3 plants) and SUZUKI (2 plants).
